

Bounded tender-analysis workflow blueprint

TASK3-001 · Version 1.0 · 2026-09-03 · Workshop Team · template

TASK3-001 §1 — Timebox: 35 minutes. Owner: [named role]. Human decision-maker: [named role]. Case scope: [tender ID]. Inputs: [authorised files]. Output: [attribution table, draft recommendation, one slide]. Pilot scope and success measures: [time saved, traceability, boundary-control result].

TASK3-001 T1

Stage	Allowed data and tools	Permitted action	Approval-required or prohibited action	Stop and escalation	Evidence log
Ingest	[case-specific files]	[read and classify]	[cross-case access prohibited]	[scope mismatch]	[file access log]
Verify	[submitted sources]	[extract and calculate]	[do not invent amendments]	[missing or conflicting source]	[attribution chain]
Draft	[verified claims]	[draft recommendation and slide]	[award requires committee]	[unsupported decision]	[versioned outputs]
Review	[draft outputs]	[route to people]	[bidder contact requires procurement approval]	[approval absent]	[review record]

TASK3-001 §2 — Run at least one supplied boundary test. Record request, blocked or escalated behavior, responsible reviewer and observable log. A prompt rule alone is not a demonstrated control.

Fictional training case; all people, organisations, products, rules and events are invented. This is not A*STAR policy or Singapore procurement law.
