I am reviewing the RE-300 implementation plan for the evaluation file. Please confirm the date from which the Institute can treat the system as handed over, and the point at which your service schedule begins. Please refer to the wording already in your submitted offer.

Commissioning complete on 20 January 2027 is the milestone at which our engineers hand the RE-300 over as ready for use, and the Institute can plan its first research runs from that date. Operator training is scheduled beforehand. Warranty and support start as set out in MER-05. The implementation dates and quoted price remain as submitted.
