

Internal clarification on project-end service

EMAIL-001 · Version 1.0 · 2026-08-11 · Project and Procurement Teams · clarification

EMAIL-001#INT-M01 — Dr. Anika Rao, 2026-08-10: I am checking the equipment assumptions for the dataset plan. We expect the validated file before final project close-out, but verification questions and any targeted reruns may follow. Please make sure the maintenance and support period in the tender covers operation through 31 March 2030 rather than stopping when the dataset is first delivered. I will keep the operational plan aligned with the approved grant dates.

EMAIL-001#INT-M02 — Mira Tan, 2026-08-11: The issued mandatory schedule already states the project-end coverage date, so the panel should use that published requirement for every bid. We can answer bidder questions through the usual procurement channel, and any proposed change to a submitted supplier term has to be documented in the tender record under the RFQ procedure. I will add a check of the signed service appendices to the evaluation file.

Fictional training case; all people, organisations, products, rules and events are invented. This is not A*STAR policy or Singapore procurement law.
