INITIAL-002 §3 Dashboard reading note

INITIAL-002 §3.1 — The dashboard is a concise view of the first-pass evaluation. It lists each supplier once, shows the current mandatory result and presents a weighted score where the working gate allows one. The colour and order of rows are intended to make the proposed preference easy to scan in a leadership discussion. Figures have been taken from the comparison extract and evaluation workbook; this page does not reproduce each supporting clause.

INITIAL-002 §3.2 — Decision makers should consult the underlying offer and RFQ schedules when a gate or price is material to the decision. The dashboard is a presentation aid built from a working data state. If a source check changes an eligibility label, the chart, table, headline and source note should all be regenerated from the corrected record before circulation.
