

Evaluation guide

RFQ-005 · Version 1.0 · 2026-07-06 · Procurement Office · approved

RFQ-005 §1.1 — Apply M1–M7 as pass/fail gates using the authoritative submitted record. A failure on any one gate excludes the proposal from weighted ranking. An unknown price or conditional commitment cannot be scored as compliant.

RFQ-005 T1

Criterion	Weight	Panel scoring basis
Technical performance and useful capacity	35%	Locked 0–100 panel score; excess capacity receives diminishing benefit
Total evaluated lifecycle cost	30%	Locked 0–100 panel score based on complete included cost and price bands
Delivery, installation and training	20%	Locked 0–100 panel score against plan credibility and lead time
Service above mandatory minimum	15%	Locked 0–100 panel score; minimum compliance alone is not full marks

RFQ-005 §2.2 — For an eligible bid, $\text{total} = 0.35 \times \text{technical} + 0.30 \times \text{lifecycle cost} + 0.20 \times \text{delivery/training} + 0.15 \times \text{service}$. Round the sum to one decimal place. The recorded panel criterion scores remain fixed when another bid fails a gate; they are not renormalised by bidder set.

RFQ-005 §3.1 — The panel recommends; Mira Tan verifies process and Joel Lim checks budget. The Executive Approval Committee makes the human decision after ordinary due diligence. A workbook or AI memo is a derived aid and is not itself an award.

RFQ-005 §4 Panel working procedure

RFQ-005 §4.1 — The panel should use a common gate sheet for all bidders. For each requirement, record the source document, exact clause or schedule row, quoted value and resulting pass, fail or unresolved status. Resolve simple transcription errors against the submitted source. Where the record lacks a mandatory commitment, do not substitute a supplier aspiration, forecast or evaluator assumption. The gate outcome should be reviewed before the score sheet is used.

RFQ-005 §4.2 — Criterion scores reflect a locked panel assessment of the submitted offers and their documented features. A bid's score does not increase because another bid becomes ineligible. The weighted calculation is a mechanical combination of those scores and published weights. Check each multiplication, the one-decimal rounding, and that the displayed ranking includes only gate-passing bids.

RFQ-005 §5 Decision record

RFQ-005 §5.1 — The recommendation should state the eligible set, the leading eligible score, key trade-offs and any due diligence needed before commitment. If a material price or term is unknown, label it as unknown. A hypothetical improved offer may be relevant to a separate authorised procurement action, but it is not part of this tender's submitted ranking. The decision paper should also identify the source status of each decisive statement.

RFQ-005 §5.2 — A staff member preparing a slide or dashboard should reconcile its figures and labels with the approved evaluation record. Visual emphasis must retain the gate distinction; an excluded bid is not simply a lower-scoring point on a chart. Procurement and Finance should sign off their respective checks before the Executive Approval Committee considers the case.

RFQ-005 §6 Audit trail

RFQ-005 §6.1 — Keep the gate assessment, criterion scores, calculation workbook, source references and panel sign-off together in the evaluation file. A change to a gate input should be logged with the old and new value, the reason, the source and the reviewer. Derived tables and leadership materials should be regenerated from the approved data state. This avoids a corrected workbook coexisting with an outdated recommendation slide.

RFQ-005 §6.2 — The committee paper should separate facts that are in the signed tender record from assumptions, proposed negotiations and post-evaluation due diligence. It should identify the preferred eligible bid and the basis for that choice without implying that the panel has exercised award authority. Procurement remains responsible for any bidder communication after the panel recommendation.

Fictional training case; all people, organisations, products, rules and events are invented. This is not organisational policy or Singapore procurement law.
