

Mandatory requirements schedule

RFQ-002 · Version 1.0 · 2026-07-06 · Procurement Office · approved

RFQ-002 T1

ID	Requirement	Evidence required
M1	Total evaluated price ≤ S\$450,000 excluding GST	Submitted commercial schedule
M2	SAT by 31 January 2027	Submitted implementation plan
M3	At least 48 specimens per run across specified ranges	Submitted technical schedule
M4	Raw readings and event logs export as CSV or JSON without continuing hosted service	Submitted technical schedule
M5	Price includes installation, SAT and training for eight staff	Submitted commercial and implementation schedules
M6	Warranty, two PM visits yearly and two-business-day response from SAT through 31 March 2030	Submitted service schedule
M7	Mandatory commitment documented in proposal or formal pre-close amendment; conditional email does not amend	Submitted record and RFQ-006

RFQ-002 §2 Reading the schedule

RFQ-002 §2.1 — The requirement IDs remain stable across the tender, bidder responses and evaluation records. A response should identify a concrete submitted passage for each claimed compliance result. A numerical total alone cannot establish the included scope, and an implementation date alone cannot establish the duration of warranty or technical response. Read the main response with the relevant signed appendix.

RFQ-002 §2.2 — The gate is conjunctive: every mandatory item must be satisfied before a bid receives a weighted rank. The evaluator should record the observed value, evidence status and any calculation used. Where a capability, price or service condition depends on a later option, the submitted base offer must be assessed as written. Distinguish an explanation of existing wording from an amendment that adds an obligation.

RFQ-002 §3 Evidence conventions

RFQ-002 §3.1 — For M1, use the complete evaluated price excluding GST and reconcile it with required inclusions. For M2, use the committed Site Acceptance Test date rather than shipment or installation. For M3 and M4, use the delivered technical configuration and export capability. M5 and M6 require a read across commercial, implementation and service records. M7 asks whether a claimed mandatory obligation actually entered the submitted tender record by close.

RFQ-002 §3.2 — Record a failed or unresolved gate with the exact source passage, not a general impression of the supplier. A clarification may be relevant to interpretation, but its status must be retained in the evidence chain. The gate result should be reproducible by another reviewer using the same documents and dates.

Fictional training case; all people, organisations, products, rules and events are invented. This is not A*STAR policy or Singapore procurement law.
